

LUXOR
LV
NEW STYLE

sagi

Elegance & Class

The elegant, strong, modern lines, exquisite in every detail, make Luxor New Style the ideal vertical refrigerated display unit for pastries and ice-cream products, restaurants and new catering outlets, created not just to put foods on show but also to engage with customers and stimulate their interest.

Aesthetic Perfection

The linear design includes a display section made of screen-printed tempered glass, heated in low-temperature models.

The elegant dimensions and slender structure with integral “invisible” handle optimise visibility from the first to the last shelf.

The internal supports, designed to lighten the structure and ensure the utmost versatility, allow full use of the entire display surface and place the focus firmly on the product itself.

The contemporary styling of the base section maintains the display unit’s purity of aesthetic and cleverly conceals the control board, while the display is constantly visible for monitoring operation at all times.

Dynamic lighting for mood creation

3000 K 4000 K 5000 K 6000 K

The high brightness anti-glare LED bars provide lighting that adapts to suit the surroundings: from warmer effects for intimate ambiances to an icy tone for more modern interiors.

The type of light can be changed at any time depending on the product displayed, to underline the character of every creation, from chocolate to cream pastries, and from classic cakes to single-portion confectionery... you will have the right lighting for every one!

Sablè

Trendy colours

Customers have their choice of three colours, White, Black and Sablè, making Luxor New Style adaptable to any location and matching the latest trends in interior design. From contemporary to industrial to eco, Luxor New Style is always elegant and discreet.

ESSENTIAL DETAILS

Eye-Catching Sixth Sense!

Luxor New Style brings to life the products you display. With its **PIR Sense proximity sensor**, the display unit changes light intensity as customers approach. It tempts customers to make a purchase, captures their attention, enhances your customer care and adds value to your products.

Luxor New Style launches a new generation of display units: no longer inert, they engage and communicate with the customer!

Always under control!

The electronic control board with the communication port allows precise control of operating parameters as well as HACCP alarm alerts: your guarantee of safe, quality display.

Luxor also embraces wine

Luxor is not only extraordinarily beautiful and elegant, but also extremely flexible. With the new wine bottle accessory you'll be able to construct your Luxor to your needs, choosing the number of bottle shelves and the display mode: vertical, horizontal or mixed. Luxor is able to contain up to 84 wine bottles (diameter: 75 mm) vertically on three shelves for ... 8 models, or up to 48 bottles for ... 6 models.
