REAL-TIME DATA

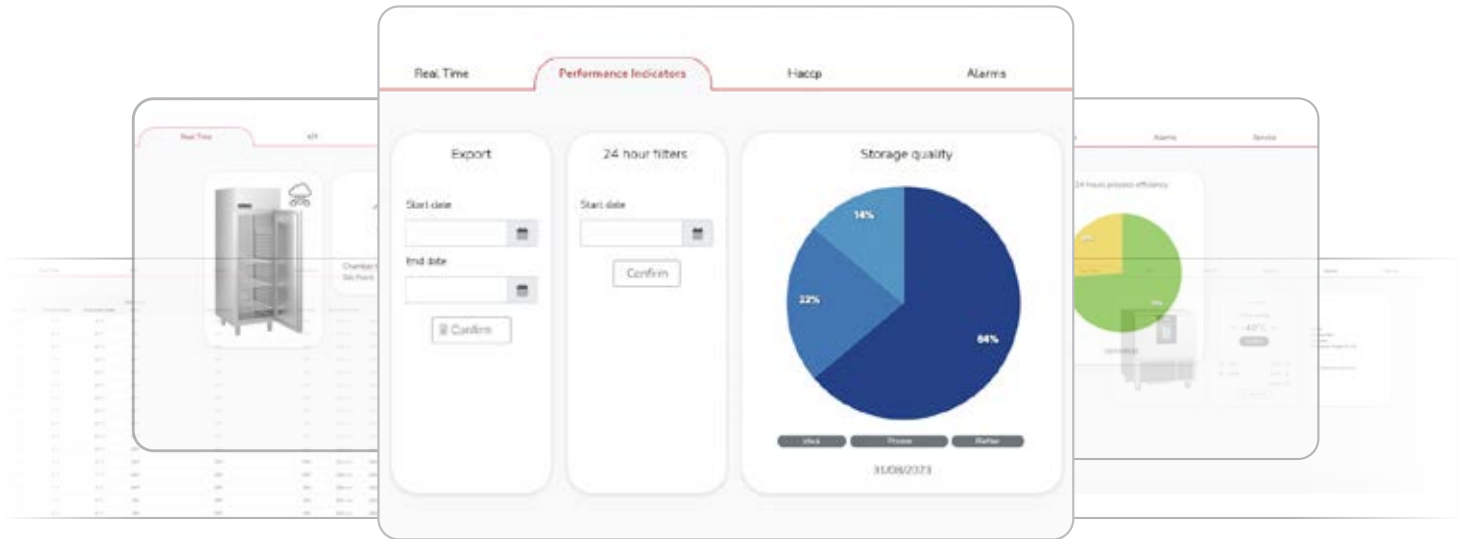

You can view the appliance's status in real time, edit parameters and save the log, to improve your kitchen's efficiency and achieve optimal management of operations.

HACCP ALARMS

Immediate email and/or mobile phone notifications help you to identify critical points within the food preparation process fast, even remotely.

PERFORMANCE INDICATORS

VIA THE APO.LINK PORTAL, YOU CAN MONITOR THE PERFORMANCE INDICATORS OF THE CONNECTED APPLIANCES AND TAKE CORRECTIVE MEASURES TO REDUCE COSTS, LIMIT WASTE AND OPTIMISE PROCESSES' EFFICIENCY.

and much, much more...

CORRECT STORAGE

It tells you how closely refrigerated appliances have maintained your chosen storage temperature. If performance is poor, you can check for appliance faults, overloading or the insertion of over-warm foods..

DOOR OPENING

Continually opening the door of a refrigerated appliance while it's running lets cold air escape, increasing energy use and reducing the storage quality of refrigerated foods. Monitoring door opening is fundamental for corrective actions that reduce energy use and waste.

Email and/or mobile phone notifications

All data for the best remote diagnostics

Cyber Security and Privacy guaranteed

CONNECTING APPLIANCES HAS NEVER BEEN SO
QUICK AND EASY!

CHOOSE MODELS THAT ARE CONNECTABLE AS STANDARD OR WITH
EASILY INSTALLED ACCESSORIES

We've designed the registration and appliance configuration and connection procedure with you in mind!
A unique, extremely user-friendly system that recognises your appliances automatically.

JUST A FEW STEPS AND YOUR KITCHEN IS ONLINE!

NO INSTALLATION COSTS!

01.

CONNECT

Connect your appliances* and smartphones or tablets to your location's network

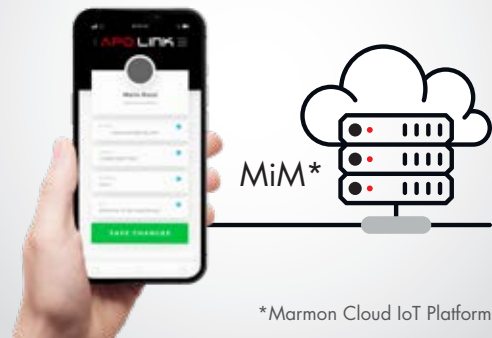

* Via Ethernet cable

02.

CREATE YOUR ACCOUNT

Create a new account, if you don't already have one, on our dedicated Web App**

**Marmon Cloud IoT Platform

03.

CONFIGURE THE APPLIANCE

Scan the QR code sticker on the appliance using the Web App on your smartphone or tablet.**

04.

COMPLETE YOUR REGISTRATION

Fill in just a few additional data and your appliances will be on the APO.LINK portal.
